

Figure 1

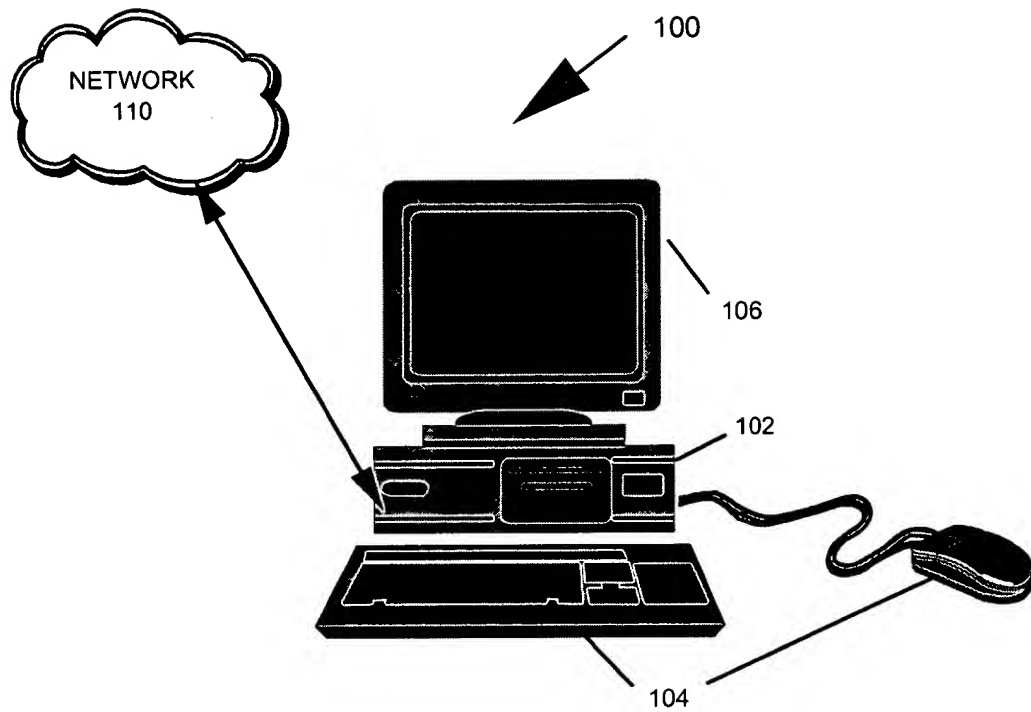

Figure 2

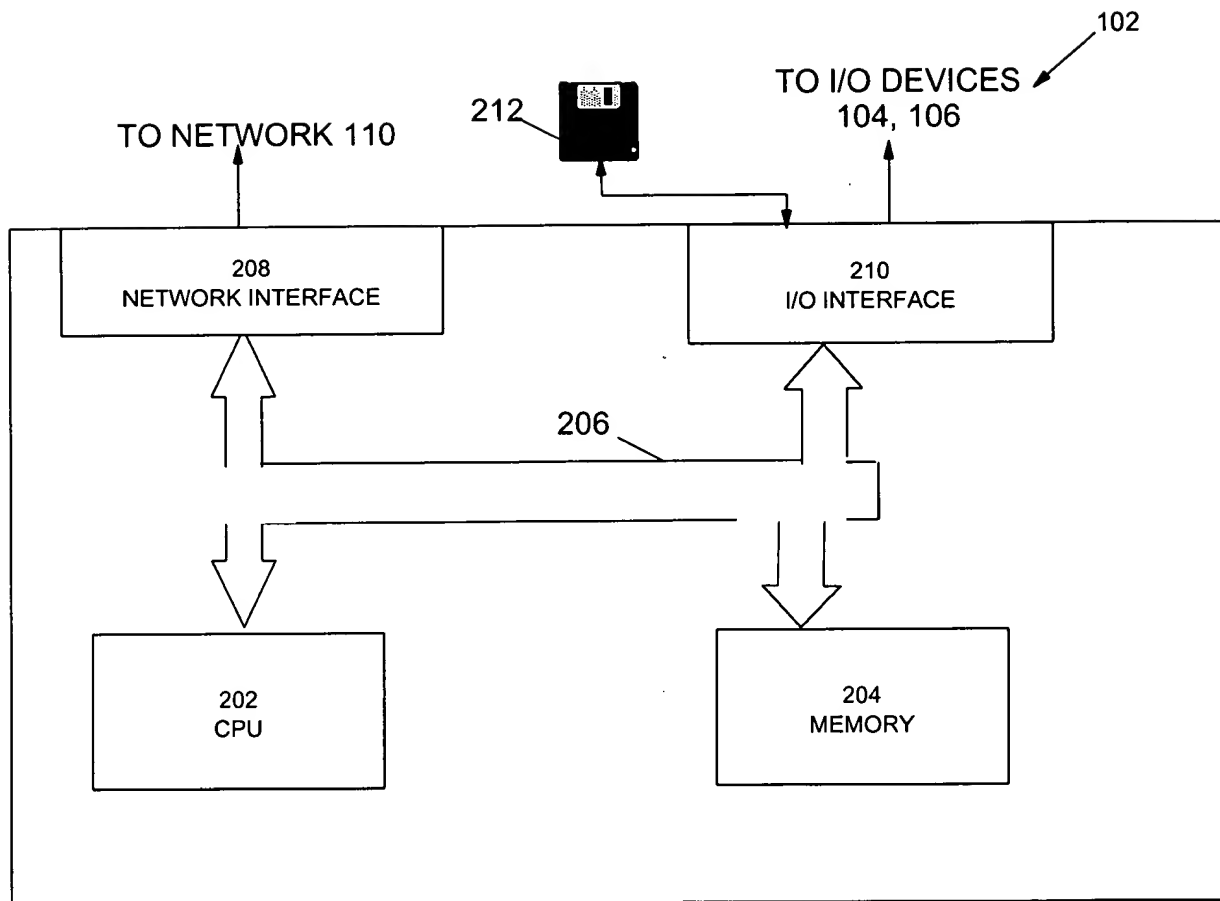

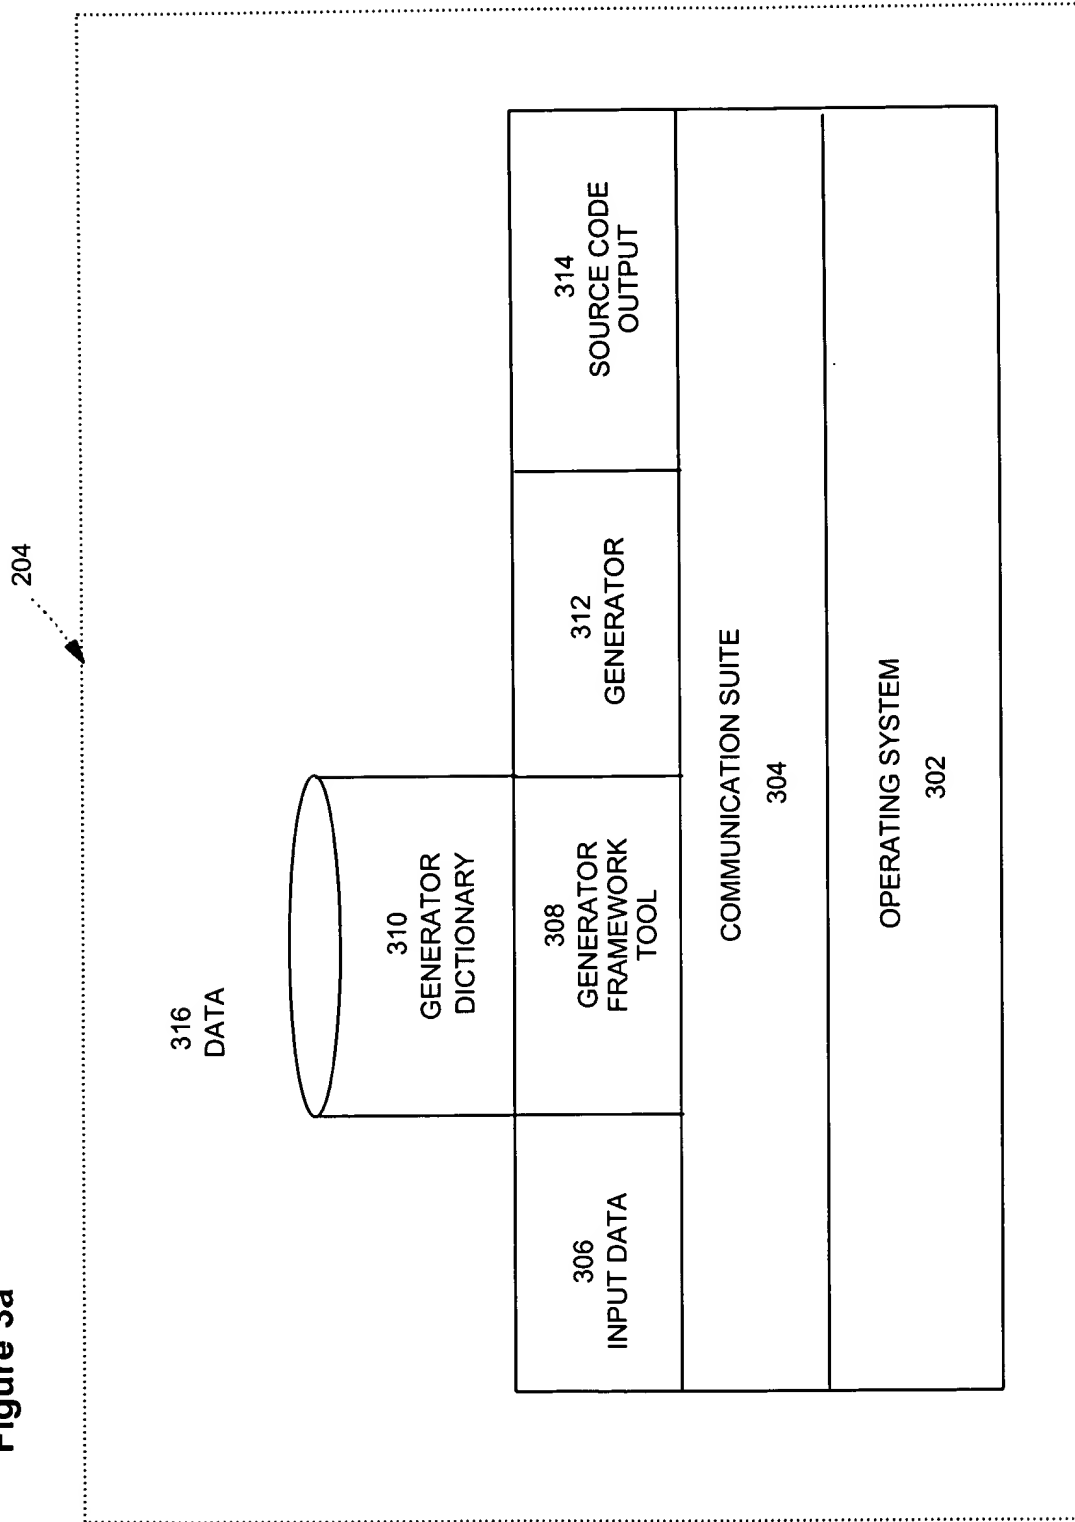

Figure 3a

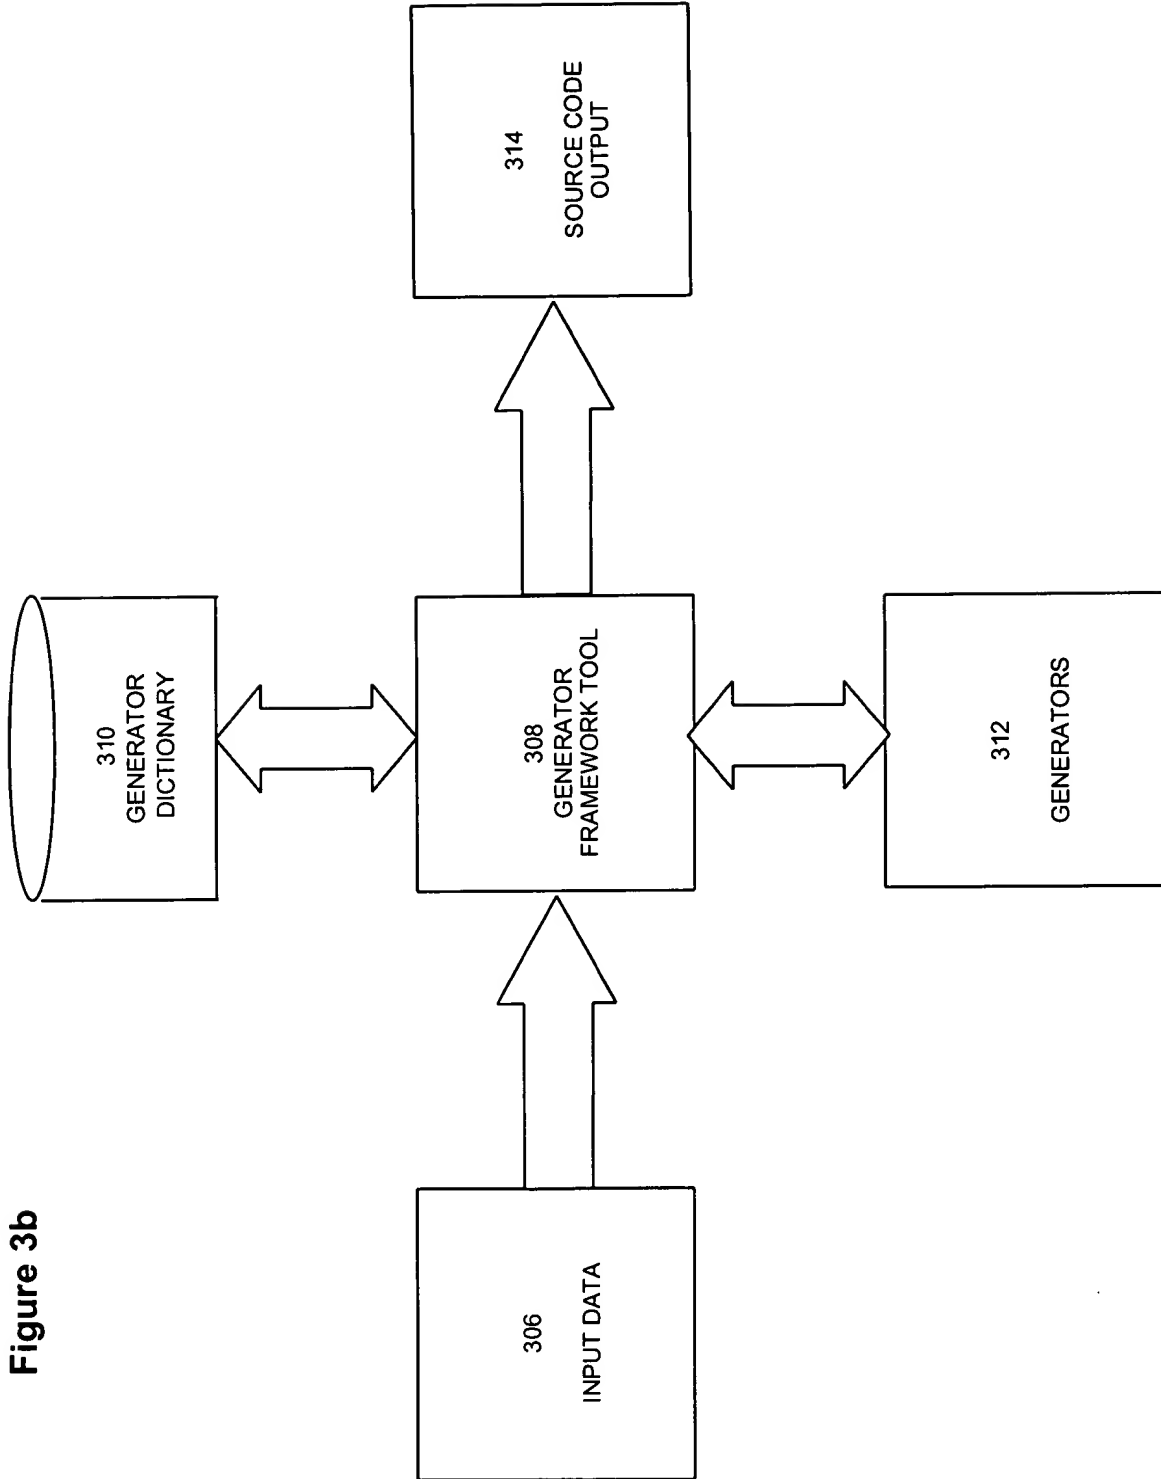

Figure 3b is a block diagram of a generator framework tool system. The system includes an input data block 306, a generator framework tool block 308, a generator dictionary block 310, a generators block 312, and a source code output block 314. The input data block 306 is connected to the generator framework tool block 308. The generator framework tool block 308 is connected to the generator dictionary block 310 and the generators block 312. The generator framework tool block 308 is also connected to the source code output block 314.
